SUMMARY

Hands-on Software Engineering Manager with 15+ years of experience in cloud engineering, SaaS product development, and DevOps. Expert in Azure, microservices, Kubernetes, CI/CD, and Agile delivery. Skilled in project planning, risk management, and driving predictable delivery. Known for building strong stakeholder relationships, selecting the right technical frameworks, and guiding teams through complex business and technology challenges. Proven leader skilled in driving engineering excellence, improving processes, and mentoring global teams. Passionate about automation, workflow simplification, and delivering scalable, customer-focused products.

CORE SKILLS

Azure • Kubernetes • Microservices • Java • Spark • SQL • CI/CD • DevOps • React • Cypress • Agile/Scrum • Program Management • Leadership • Stakeholder Communication • Risk Management • Test Automation • Performance Optimization • Azure/AKS • AI • RAG • ML

PROFESSIONAL EXPERIENCE

PROS Inc., Houston, TX

Software Engineering Manager | 2018–Present

- Engineered AI agents to automate Tier-1 test cases, improving test efficiency and reducing execution time by 3%.
- Prototyped and Implemented Spec Driven Development (SDD), integrating AI-assisted documentation and validation, which reduced the overall development cycle time and improved delivery predictability.
- Built an AI-driven Support Command Center UI, automating operational queries and reducing repetitive workload for global teams.
- Integrated LLMs into Jira to auto-surface documentation, streamlining support ticket triage and reducing manual effort.
- Improved productivity by assigning simple GitHub issues directly to Copilot.
- Introduced Spec driven development to improve quality and velocity.
- Built agents that helps boost productivity like agent that can integrate with Jira and send reports to the team.

- Built a RAG-based codebase Q&A agent using LangChain, ChromaDB, and Groq (Llama 3) that ingests GitHub repositories and returns answers with exact file and line citations via hybrid vector + keyword search.
- Built an interactive machine learning application that recognizes user sketches and adapts over time through user feedback.
- Leading global engineering teams and migrated legacy modules to microservice. Engineered Spark-based pipelines reducing processing time from hours to minutes.
- Led the team to migrate 100+ screens from legacy UI to React.
- Created executive JIRA portfolio dashboards, reducing reporting time by 30%.
- Led Willingness-to-Pay feature development, contributing to 3% revenue increase.
- Led the migration of deployments to Rundeck, enabling self-service and reducing deployment time by 30%.
- Implemented SMART goals and coaching programs, achieving 90% team retention.

Lead Software Engineer | 2017–2018

- Led design and delivery of microservices and distributed components, ensuring scalability and performance.
- Drove technical decisions, code quality standards, and best practices across the engineering team.
- Partnered with Product and UX to define technical requirements and deliver customer-focused features.
- Guided sprint planning, story refinement, and technical estimations to improve delivery predictability.
- Mentored engineers through design reviews, pair programming, and technical coaching.

Senior Software Engineer | 2016–2017

- Designed and developed microservices, REST APIs, and cloud-native components.
- Improved performance and reliability through refactoring and automation.

Software Engineer | 2014–2016

- Developed core modules for airline revenue management using Java and SQL.
- Built UI components and automated tests to improve quality.

Fiserv, Charlotte, NC

Sr. Systems Analyst | 2010–2014

- Full-stack development for CPO payments product (ACH/NACHA). Performed ethical hacking using Paros and AppScan.

- SCRUM Master; applied Agile, Scrum, SAFe, Kanban.

DXC Technology, India

Engineer – Application Development | 2006–2010

- Developed Java-based applications and web services for SICS reinsurance product.

EDUCATION

B.Tech, Computer Science Engineering

Harcourt Butler Technological Institute, Kanpur, India
